

## Cover Cleaning Instructions

Cover fabric performance can be severely affected by dirt that builds up on and within the material creating a “wicking” effect that actually helps pull water through the fabric, nullifying any water resistant properties the fabric may have had. Cleaning your cover will help to keep your motorcycle, scooter or ATV clean and also increase the service life of the cover.

### **For Pack Lite™ WeatherShield®, Form-Fit® and Flannel Covers ONLY:**

NEVER...Clean a cover in a washer with a center agitator (OK if you don't have a choice for WeatherShield® fabric covers).

NEVER...Use fabric softener.

DRY with Care... WeatherShield fabric & Form-Fit covers can be dried in a dryer with regular heat; flannel can be dried on low heat.

- 1 - Using a large commercial washer without agitator, wash the cover using 1/4 cup of Simple Green All-Purpose Cleaner. Put the cover in the washer and pour the cleaner in the tub after it's filled with warm water or pour it directly in the machine (some wall mounted commercial units), then put in the cover and start the machine .
- 2 - Rinse the cover twice (2X) to remove all the cleaner.
- 3 - Dry in a dryer with regular or low heat...or hang to air dry.

### **For Urethane Coated Cycle, Scooter and ATV Covers ONLY:**

Clean the cover while installed or lay on a flat surface.

- 1 - Mix one ounce Simple Green All-Purpose Cleaner per quart of warm water.
- 2 - Spray or sponge onto cover.
- 3 - Rinse with plain water (until no suds) and allow to air dry.

Simple Green is available in most world markets. If you have any questions, contact them at 1-800-228-0709 (USA) or visit their web-site [www.simplegreen.com](http://www.simplegreen.com)

If you have additional questions regarding the use or cleaning of your cover, please contact Covercraft Customer Service at 1-800-866-8621 (USA) M-F, 9AM to 4PM CST, or by email at [sales@covercraft.com](mailto:sales@covercraft.com)
